

Powering every day.
Fueling future goals.

Surface devices make the most of Windows 11 and Microsoft 365* to deliver the greatest impact.

Devices designed by Microsoft unlock technology that adapts to your team and scales with your ambition. Powerful security that extends from firmware to the cloud gives you peace of mind, and streamlined manageability means ease of use that helps employees and IT do more with less.

We created Surface to meet the needs of SMBs with features built around collaboration, productivity, and versatility. By keeping people connected, engaged, and secure, Microsoft Surface powers the employee experiences that fuel your future goals.

The best of Microsoft

Do more with less—less budget, less complexity, and less risk. We've designed Surface devices from the ground up to give employees the versatility they need and IT pros the control and flexibility to keep your business running efficiently.

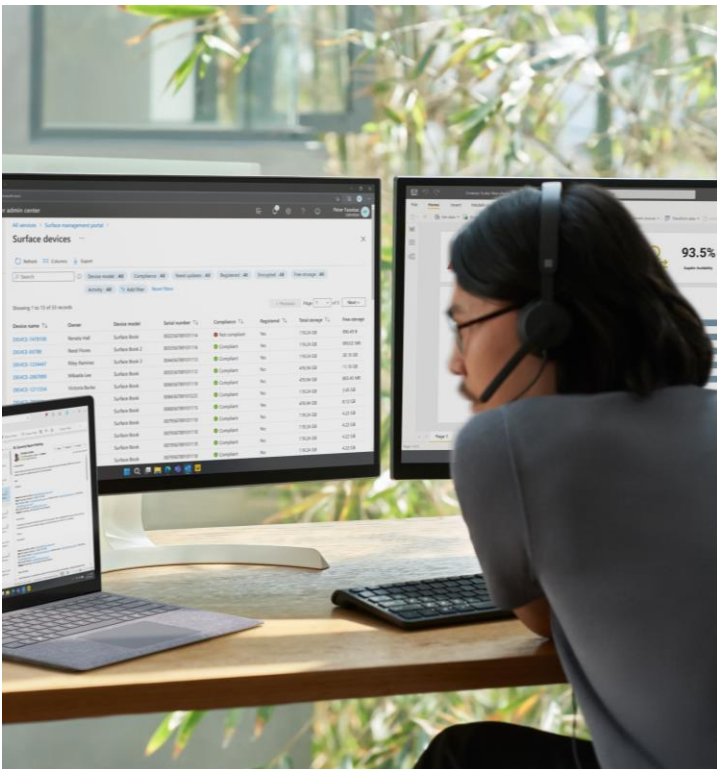

Combining the Surface portfolio with Microsoft Intune* admin center, Windows Autopilot, and Surface self-serve portals unlocks agility in how you deploy and manage your devices, all on a single platform. Improved IT efficiency, reduced overhead and support costs, and minimized downtime: these are the benefits that organizations who adopt Surface can expect.

Bring out the best in your people and your business with Surface.

Safe and secured

We hold Surface devices to the same standard as all Microsoft services and software. To safeguard your goals, Surface provides uncompromising chip-to-cloud security, gives you the control you need, and delivers peace of mind wherever and however work gets done.

Security threats continue to escalate in scale and sophistication. Whatever the size of your business, you need world-class security at every layer—across hardware, firmware, software, applications, cloud, and identity. From conceptual design to a team member's first Hello, Surface reduces complexity and elevates trust. When your teams feel protected, they can focus on moving the business forward.

*Software license required for some features. Sold separately.

Versatile by design

Work comes in all shapes, sizes, and places. Built for versatility and choice of performance, each Surface 2-in-1 features the iconic kickstand combined with a PixelSense™ touch display and connects with our Signature Keyboard and Surface Pen.*

Every Surface 2-in-1 seamlessly transforms from a full touchscreen laptop into a portable tablet, a digital canvas, or a docked workstation. Optional LTE¹ or 5G² keep frontline, remote, and work-from-anywhere teams connected. And performance—from the most powerful Surface Pro 9 to the compact Surface Go 3—is customizable to your needs. This is portability and connectivity, made to flex to the way your team works.

Powerful productivity

From the moment you press the power button, Surface brings together the best of Microsoft hardware and software to drive impact. We designed Surface to deliver productivity right out of the box and create connected experiences through seamless integration with Windows 11 and Microsoft 365**.

Experience better collaboration as you look and sound your best with capabilities powered by advanced AI. Meetings run smoother and collaboration happens in the moment through dynamic video calls, on-screen inking, and fast, secure mobile connectivity. Teams can tackle high-performance tasks with the latest processors on devices that don't quit thanks to all-day battery life.³ Give employees the tools they need to amplify productivity and enhance collaboration on one intuitive platform.

*Sold separately.

**Software license required for some features. Sold separately.

¹LTE functionality available on select configurations only. Service availability and performance subject to service provider's network. Contact your service provider for details.

²5G not available in all areas, mmWave in US only. Supports Sub-6 GHz, not available in all areas; compatibility and performance depend on carrier network, plan and other factors. See carrier for details and pricing.

³Battery life varies significantly based on usage, network and feature configuration, signal strength, settings and other factors. See aka.ms/SurfaceBatteryPerformance for details.

Why businesses choose Surface

// [Surface] meets the use cases here. They're ergonomic, lean, and mobile. For the Surface Pros, our employees are also able to use them as a detachable tablet.

Tolu Thomas
Director of End User Computing Services

Annuity and life insurance provider Brighthouse Financial, Inc. is boosting innovation and rethinking its entire technology platform. Microsoft Surface and Teams empower its cloud-first, SaaS-focused environment to drive new ways of collaborating across the company. Together, they help employees efficiently deliver on their core mission: helping people achieve financial security.

"Now, I use a Surface Laptop Studio—a beautiful, streamlined device that's much more powerful than the last one and easily runs the most complex creative software. I can take photos with my mobile device, use it as a hotspot, and do whatever I need to do from a construction truck, even in a remote area."

Maria Rodriguez
Digital Media and Marketing Specialist

"It's imperative that our colleagues in the field have devices and applications that are easy to use, load quickly, and are available when they need them. Physicality also plays a role—Surface devices have a touchscreen that offers practical functions like digital signatures."

Thomas Gessler
Chief Information Officer
